# Green Blade ® Original

Green Blade ® Original is a wall coating solution in strip on adhesive foam support, available in all our packages. Declined in strip 119 x 15 cm with an orientation vertical of fiber (119 cm). The installation is very simple, just remove the protective film and stick the strip on the wall without it.

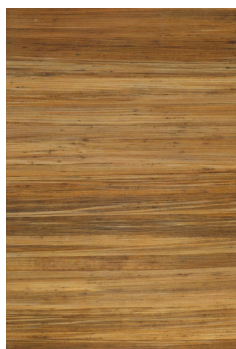

Do not hesitate to consult the instruction manual.

# INSTRUCTION MANUAL

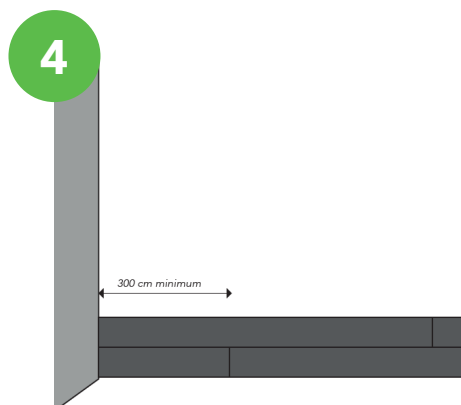

Start by making a level line **150mm** from the lowest point of the wall.

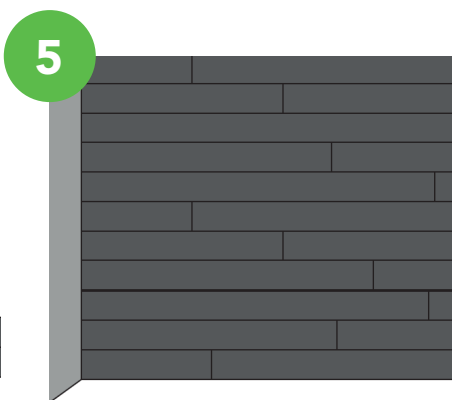

Lay the first plank **along the line**, starting from one end.

Lay the second plank of the row, coming against the first, **edge to edge** and following the level line. Cut out the last blade with the utility knife and square, in several passes.

Once the first row is finished, cut and glue the boards under the first row, by shifting the joint of at **least 30cm** compared to the one above.

Proceed in this way for the entire surface to be produced. Take care **to stagger the joints**. Apply a dry cloth to the whole thing when finished.

# FEATURE

ORIGINAL		
Green Blade Veneer		Origin
Composition	100% banana «trunk» fiber	Martinique
Substrates	FCS non-woven + kraft + ADM E136 double sided adhesive	UE
CHARACTERISTICS		
SUSTAINABLE	Natural, Wood Free, Recycled material, Bio-degradable	
COMPOSITION	100% European Banana trunk sliced available on a non-woven backer or Kraft impregnated paper both FSC certified, designed in France	
DIMENSIONS	1190x150mm (3.9x0.49pi) or other dimensions on request	
THICKNESS	2.1mm	
BENDING	Minimum radius 20cm	
SUPPORT	Partition wall, drywall and concrete, on a dry and clean surface. Do not use in damp rooms.	
CLEANSING	Dry or slightly damp cloth	
FINITION	27µ protective overlay, matte finish	
GRAIN ORIENTATION	Vertical (on 1190mm)	
TRANSLUCENCE	0%	
CERTIFICATIONS	LEED certification (7 points in 3categories) and FSC for backings	
C02 EMISSIONS	0,05 CO2eq/ kg	
VOC EMISSIONS	Low

# CERTIFICATIONS

Green Blade® and the environment Fibandco takes great pride in offering sustainable, high-performance products. All Green Blade® products use our plant based veneer from recycled banana plant trunks. Fibandco recycle the trunk (or stem) of the plant once the fruit has been harvested. After bearing fruit, the banana plant naturally dies, for a new plant to grow from the bulb. Hence Fibandco give a second life to a by-product of banana farming. No water is used in the manufacturing of Green Blade®, and the Fibandco factory produces the energy it uses thorough solar photovoltaic panels.

Products certified to European and French standards.

Most of Green Blade panels products are classified A+ (French VOC emission certification)

All panels used to make Green Blade® products are FSC certified. The Forest Stewardship Council is an international not for-profit, multi-stakeholder organization established in 1993 to promote responsible management of the world's forests.

Green Blade could contribute positively to BREEAM guidelines  
Hea 02 Indoor air quality  
Mat 01 Life cycle impacts  
Mat 03 Responsible sourcing of materials

Green Blade could contribute positively to LEED credits

## MATERIALS & RESOURCES

MRc 4 Recycled content (2 points)  
Green Blade is 100% recycled banana trunk  
MRc 5.1 & 5.2 Regional materials (1-2 points)  
The final assembly location determines the opportunity for these credits.  
MRc 6 Rapidly renewable materials (1 point)  
Banana trunk renews every 9 months after each banana bench harvesting.  
MRc. 7 Certified wood (1 point)  
FIBANDCO use certified FSC and PEFC companies for panels production.

## INDOOR ENVIRONMENT QUALITY

EQc 4.1 Low-emitting materials – adhesives and sealants (1 point)  
FIBANDCO uses low-VOC glues for all products.  
EQc 4.2 Low-emitting materials – paints and coatings (1point)  
Lambri uses low-VOC finishes for all products.  
EQc 4.3 Low-emitting materials – composite wood and agrifiber products (1 point)  
FIBANDCO products can be produced with low VOC and/ or no added urea formaldehyde (NAUF) substrates.
